ABOUT

Hello! 😊

My name is David and I am a seasoned developer, programming for over 15 years. I really like C# and whole .NET ecosystem, so I made it my primary language of choice on various problems and solutions.

I am trying to improve myself, learning new technologies, reading articles and watching technology videos.

Hand in hand with working on computers, I am also keen on sports - from

from Pubbee and netball to more team events like laser tag games, escape games, corporate gatherings and such.

PROJECTS

Globus

Long-term project delivering new features for backends powering products, coupons, shopping lists, image assets.

- Client communication & analysis
- Feature delivery & maintenance
- Main authorization system ownership

C#

.NET

Rest API

MSSQL

MongoDB

Docker

Authorization

Architecture

Analysis

2021 - PRESENT

Peyvee

Development of Mobile Android application.

C#

.NET

Xamarin

RealmDB

Mobile

Android

2021 - PRESENT

KODYS

Backend & tooling across .NET/C# stack.

.NET

C#

2019 - 2021

KENDAXA

KENDAXA Development

Contributions to internal dev tooling and services.

.NET

C#

2019

Penzijní Společnost České Pojišťovny

Blazor/.NET work on internal applications.

Blazor

.NET

C#

Česká Spořitelna

Blazor/.NET features and integrations.

C#

TECHNOLOGIES

Area	Technology	Experience	Notes
Operating Systems	Windows Linux	15+ years	Windows as daily use, I tried Linux from curiosity.
Analysis & Design	-	4 years	Designing new features, analysing problems and errors.
Project Control	JIRA Confluence Plus4U	10+ years	Code level tools used in delivering successful projects.
Code Flow	GIT SVN DevOps CI/CD	10+ years	Started with SVN, moved to GIT. Using AzureDevOps CI/CD pipelines on projects.
Databases	MongoDB EntityFramework NHibernate MySQL SQLite RealmDB ACCESS	15+ years	Databases I have worked on - the most usual being MongoDB and MSSQL (EntityFramework).
Programming Languages	C# C/C++ Java LUA Python	15+ years	C# absorbed me even from young age, it's my favorite language number one. I have also touched Java and Python and for few years I tried to bring joy and good time to player on private World of Warcraft servers.
Web Technologies	ASP.NET MVC ASP.NET API Blazor	10+ years	I have tried many Web technologies in the ecosystem of .NET. I can also write JavaScript

Area	Technology	Experience	Notes
	<div>HTML</div> <div>CSS (SASS)</div> <div>JavaScript</div> <div>JQuery</div>		manually! I also like to use SASS over plain CSS.
Mobile Technologies	<div>Xamarin</div> <div>MAUI</div> <div>Avalonia</div>	10+ years	Even mobile development did not pass me, so I have tried what .NET offered.
Game Technologies	<div>Godot</div> <div>Unity</div> <div>TrinityCore</div>	15+ years	I have gathered many experiences in gaming development, especially at the start of my career on World of Warcraft emulator. Now I am passionate user of Godot.
Other	<div>JSON</div> <div>XML</div> <div>WPF</div> <div>WinForms</div> <div>Micro-controllers</div> <div>IoT</div> <div>AI</div>	15+ years	I also know some "old" technologies like WPF or even Windows Forms. My curiosity even led me to IoT and, chained with game development, to work on designing my own AI characters for my games.
Currently Learning	<div>AI</div> <div>Godot</div> <div>Cubernetes</div> <div>Docker</div>	15+ years	Smart person always learn, right?
